DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 7-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Matsushima (4060114).

Matsushima discloses the claimed invention as claimed in claims 1-5, and 7-8 comprising a shank (1), a spindle (5) with a hexagonal shape, a spring wire (6), a groove (13), and bore (16) .

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushima (4060114).
 - a. Matsushima is discussed above.
 - b. Matsushima discloses the claimed invention except for a spring with a width of 2mm. It would have been obvious to one having ordinary skill in the art

at the time the invention was made to have made a spring with a width of 2 mm, since it has been held that a discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Response to Arguments

5. Applicant's arguments filed 2/17/06 have been fully considered but they are not persuasive.

6. Applicant has amended claim 1.

c. The applicant has amended the claims for the better but "the groove, wherein the borehole has an uninterrupted closed end" does not distinguish over the prior art. The bore hole of the prior is uninterrupted at the closed end because there are no obstructions in the groove to cause an interruptions. It is clear the applicant is trying amend but this terminology is met the prior art.

Conclusion

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
